THE MINERAL BLEND BUILT FOR ACTIVE LIFESTYLES

Staying active demands more from your body. From training stress to daily movement and recovery, your muscles, bones and immune system rely on essential minerals to keep everything performing at its best. Calcium, Magnesium and Zinc are among the most important minerals for athletes and active individuals, yet they are also some of the most difficult to obtain in optimal amounts from diet alone.

Calcium supports bone and tooth structure, while Magnesium plays a key role in muscle contraction, nervous system function and energy metabolism. Zinc supports immune system strength and tissue repair, making it relevant for recovery and everyday wellness. Together, these three minerals form a powerful foundation for anyone committed to movement, performance and longevity.

Vitamin D3 completes the formula with enhanced absorption support. Low Vitamin D levels are common among indoor athletes, desk workers and individuals with limited sun exposure. Adding D3 to the blend improves calcium absorption while supporting immune system performance for a more complete daily routine.

Calcium Magnesium Zinc + D3 is designed for the modern active lifestyle. It fits easily into both training focused and wellness focused routines, making it a strong companion for gym sessions, sports, outdoor activities or simply staying consistent with daily health goals.

**SOLID FOUNDATION. STRONG PERFORMANCE.
DAILY SUPPORT YOU CAN FEEL.**

FREQUENTLY ASKED QUESTIONS

Who is this product for?
Active adults, athletes, gym goers and individuals looking for daily support for bone, muscle and immune health.

What does Vitamin D3 do?
Vitamin D3 supports the absorption of Calcium and plays a key role in immune health and muscle function.

Can I take this daily?
Yes. This formula is designed for consistent daily use.

Is this formula suitable for both men and women?
Yes. It is balanced for adults ages 20 to 45 with active lifestyle needs.

Can this support recovery?
Magnesium and Zinc contribute to muscle contraction, tissue repair and immune function which are relevant during recovery.

Suggested Use: Take 3 tablets daily with food or as directed by your healthcare provider. Best when taken consistently over time.
